Hotfixes

20/11/2014 Security Update for Windows Vista for x64-based Systems (KB3011780)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

13/11/2014 Update for Microsoft Office 2010 (KB2889828) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

13/11/2014 Security Update for Windows Vista for x64-based Systems (KB3002885)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

13/11/2014 Security Update for Windows Vista for x64-based Systems (KB2992611)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

13/11/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems (KB3003057)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install

- this update, you may have to restart your system.
- 13/11/2014 Definition Update for Microsoft Office 2010 (KB2899521) 64-Bit Edition**
This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.
- 13/11/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2978116)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 13/11/2014 Update for Microsoft Office 2010 (KB2687275) 64-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 13/11/2014 Security Update for Windows Vista for x64-based Systems (KB2991963)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 13/11/2014 Security Update for Windows Vista for x64-based Systems (KB3003743)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 13/11/2014 Security Update for Windows Vista for x64-based Systems (KB3006226)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 13/11/2014 Security Update for Windows Vista for x64-based Systems (KB3005607)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 13/11/2014 Update for Microsoft Office 2010 (KB2589386) 64-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 13/11/2014 Update for Microsoft PowerPoint 2010 (KB2878251) 64-Bit Edition**
Microsoft has released an update for Microsoft PowerPoint 2010 64-Bit Edition. This update provides the latest fixes to Microsoft PowerPoint 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 13/11/2014 Security Update for Microsoft .NET Framework 4.5, 4.5.1 and 4.5.2 on Windows 7, Vista, Server 2008, Server 2008 R2 x64 (KB2978128)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 13/11/2014 Windows Malicious Software Removal Tool x64 - November 2014 (KB890830)**
After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.
- 13/11/2014 Security Update for Windows Vista for x64-based Systems (KB3010788)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install

this update, you may have to restart your system.

13/11/2014 Security Update for Windows Vista for x64-based Systems (KB2993958)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

13/11/2014 Update for Microsoft Excel 2010 (KB2889935) 64-Bit Edition

Microsoft has released an update for Microsoft Excel 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Excel 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

13/11/2014 Update for Microsoft Office 2010 (KB2837602) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

17/10/2014 Security Update for Microsoft .NET Framework 4.5, 4.5.1 and 4.5.2 on Windows 7, Vista, Server 2008, Server 2008 R2 x64 (KB2972107)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Security Update for Windows Vista for x64-based Systems (KB3000869)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Security Update for Windows Vista for x64-based Systems (KB3000061)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Security Update for Microsoft .NET Framework 4.5, 4.5.1 and 4.5.2 on Windows 7, Vista, Server 2008, Server 2008 R2 x64 (KB2979578)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Security Update for Microsoft Word 2010 (KB2883013) 64-Bit Edition

A security vulnerability exists in Microsoft Word 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

17/10/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2968292)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems (KB2987107)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2972098)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Security Update for Windows Vista for x64-based Systems (KB2998579)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the

associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2979568)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

17/10/2014 Windows Malicious Software Removal Tool x64 - October 2014 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

25/09/2014 Security Update for Microsoft Visual C++ 2008 Service Pack 1 Redistributable Package (KB2538243)

A security issue has been identified leading to MFC application vulnerability in DLL planting due to MFC not specifying the full path to system/localization DLLs. You can protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

25/09/2014 Security Update for Microsoft Visual C++ 2010 Service Pack 1 Redistributable Package (KB2565063)

A security issue has been identified leading to MFC application vulnerability in DLL planting due to MFC not specifying the full path to system/localization DLLs. You can protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

25/09/2014 Update for Windows Vista for x64-based Systems (KB2998527)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

14/09/2014 Security Update for Microsoft .NET Framework 4.5, 4.5.1 and 4.5.2 on Windows 7, Vista, Server 2008, Server 2008 R2 x64 (KB2972216)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

14/09/2014 Security Update for Microsoft .NET Framework 3.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2974269)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

14/09/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems (KB2977629)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

14/09/2014 Definition Update for Microsoft Office 2010 (KB982726) 64-Bit Edition

This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.

14/09/2014 Update for Microsoft Excel 2010 (KB2889836) 64-Bit Edition

Microsoft has released an update for Microsoft Excel 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Excel 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

14/09/2014 Security Update for Microsoft .NET Framework 4.5 and 4.5.1 on Windows 7, Vista, Server 2008, Server 2008 R2 x64 (KB2894854)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

14/09/2014 Windows Malicious Software Removal Tool x64 - September 2014 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

14/09/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2974268)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

14/09/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2894847)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

28/08/2014 Security Update for Windows Vista for x64-based Systems (KB2993651)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/08/2014 Security Update for Windows Vista for x64-based Systems (KB2976897)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/08/2014 Security Update for Windows Vista for x64-based Systems (KB2978742)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/08/2014 Security Update for Windows Vista for x64-based Systems (KB2982791)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/08/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems (KB2976627)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/08/2014 Windows Malicious Software Removal Tool x64 - August 2014 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

16/08/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2937608)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete

listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/08/2014 Update for Windows Vista for x64-based Systems (KB2981580)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

16/08/2014 Security Update for Microsoft Office 2010 (KB2881071) 64-Bit Edition

A security vulnerability exists in Microsoft Office 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

16/08/2014 Security Update for Microsoft .NET Framework 3.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2943344)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/08/2014 Definition Update for Microsoft Office 2010 (KB982726) 64-Bit Edition

This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.

16/08/2014 Update for Microsoft Office 2010 (KB2687502) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

16/08/2014 Security Update for Windows Vista for x64-based Systems (KB2918614)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

24/07/2014 Update for Microsoft Silverlight (KB2977218)

This update to Silverlight improves security, reliability, accessibility support, startup performance, enhances line-of-business support and includes several fixes to better support rich internet applications. This update is backward compatible with web applications built using previous versions of Silverlight.

10/07/2014 Security Update for Windows Vista for x64-based Systems (KB2971850)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

10/07/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems (KB2962872)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

10/07/2014 Security Update for Windows Vista for x64-based Systems (KB2973201)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

10/07/2014 Update for Microsoft Office 2010 (KB2837606) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

10/07/2014 Windows Malicious Software Removal Tool x64 - July 2014 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

10/07/2014 Definition Update for Microsoft Office 2010 (KB982726) 64-Bit Edition

This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.

10/07/2014 Update for Microsoft Excel 2010 (KB2837600) 64-Bit Edition

Microsoft has released an update for Microsoft Excel 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Excel 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

10/07/2014 Update for Microsoft Office 2010 (KB2878252) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

10/07/2014 Security Update for Windows Vista for x64-based Systems (KB2972280)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

10/07/2014 Update for Microsoft Office 2010 (KB2837581) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

10/07/2014 Security Update for Windows Vista for x64-based Systems (KB2961072)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

10/07/2014 Update for Microsoft Office 2010 (KB2881028) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

12/06/2014 Windows Malicious Software Removal Tool x64 - June 2014 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

12/06/2014 Definition Update for Microsoft Office 2010 (KB982726) 64-Bit Edition

This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.

12/06/2014 Security Update for Windows Vista for x64-based Systems (KB2957503)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

12/06/2014 Security Update for Windows Vista for x64-based Systems (KB2957189)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

12/06/2014 Security Update for Windows Vista for x64-based Systems (KB2957509)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

12/06/2014 Security Update for Windows Vista for x64-based Systems (KB2939576)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

12/06/2014 Update for Microsoft Word 2010 (KB2880529) 64-Bit Edition

Microsoft has released an update for Microsoft Word 2010 64-Bit

Edition. This update provides the latest fixes to Microsoft Word 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

12/06/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems (KB2957689)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

12/06/2014 Security Update for Microsoft Office 2010 (KB2767915) 64-Bit Edition

A security vulnerability exists in Microsoft Office 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

16/05/2014 Security Update for Windows Vista for x64-based Systems (KB2926765)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/05/2014 Update for Microsoft Visio 2010 (KB2880526) 64-Bit Edition

Microsoft has released an update for Microsoft Visio 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Visio 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

16/05/2014 Security Update for Microsoft Office 2010 (KB2880971) 64-Bit Edition

A security vulnerability exists in Microsoft Office 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

16/05/2014 Security Update for Microsoft Office 2010 (KB2878284) 64-Bit Edition

A security vulnerability exists in Microsoft Office 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

16/05/2014 Update for Microsoft Filter Pack 2.0 (KB2878281) 64-Bit Edition

Microsoft has released an update for Microsoft Filter Pack 2.0 64-Bit Edition. This update provides the latest fixes to Microsoft Filter Pack 2.0 64-Bit Edition. Additionally, this update contains stability and performance improvements.

16/05/2014 Windows Malicious Software Removal Tool x64 - May 2014 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

16/05/2014 Update for Microsoft Visio Viewer 2010 (KB2837587) 64-Bit Edition

Microsoft has released an update for Microsoft Visio Viewer 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Visio Viewer 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

16/05/2014 Update for Microsoft Office 2010 (KB2825635) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

16/05/2014 Definition Update for Microsoft Office 2010 (KB982726) 64-Bit Edition

This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.

16/05/2014 Security Update for Microsoft .NET Framework 4.5 and 4.5.1 on Windows 7, Vista, Server 2008, Server 2008 R2 x64 (KB2931368)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

16/05/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2931354)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

[16/05/2014 Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems \(KB2953522\)](#)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

[3/05/2014 Security Update for Internet Explorer 9 for Windows Vista x64 Edition \(KB2964358\)](#)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

[19/04/2014 Security Update for Microsoft Visual C++ 2008 Service Pack 1 Redistributable Package \(KB2538243\)](#)

A security issue has been identified leading to MFC application vulnerability in DLL planting due to MFC not specifying the full path to system/localization DLLs. You can protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

[18/04/2014 Security Update for Microsoft Visual C++ 2008 Service Pack 1 Redistributable Package \(KB2538243\)](#)

A security issue has been identified leading to MFC application vulnerability in DLL planting due to MFC not specifying the full path to system/localization DLLs. You can protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

[10/04/2014 Definition Update for Microsoft Office 2010 \(KB982726\) 64-Bit Edition](#)

This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.

[10/04/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems \(KB2936068\)](#)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

[10/04/2014 Update for Microsoft Visio 2010 \(KB2553444\) 64-Bit Edition](#)

Microsoft has released an update for Microsoft Visio 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Visio 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

[10/04/2014 Security Update for Windows Vista for x64-based Systems \(KB2922229\)](#)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

[10/04/2014 Security Update for Microsoft Word 2010 \(KB2863926\) 64-Bit Edition](#)

A security vulnerability exists in Microsoft Word 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

[10/04/2014 Windows Malicious Software Removal Tool x64 - April 2014 \(KB890830\)](#)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

[10/04/2014 Update for Microsoft PowerPoint 2010 \(KB2837579\) 64-Bit Edition](#)

Microsoft has released an update for Microsoft PowerPoint 2010 64-Bit Edition. This update provides the latest fixes to Microsoft PowerPoint 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

[25/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 \(Definition 1.169.762.0\)](#)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

[23/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 \(Definition 1.169.609.0\)](#)

Install this update to revise the definition files that are used

- to detect viruses, spyware, and other potentially unwanted software.
Once you have installed this item, it cannot be removed.

- [13/03/2014 Update for Microsoft Office 2010 \(KB2863818\) 64-Bit Edition](#)
Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

13/03/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems (KB2925418)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

13/03/2014 Update for Microsoft Filter Pack 2.0 (KB2837594) 64-Bit Edition

Microsoft has released an update for Microsoft Filter Pack 2.0 64-Bit Edition. This update provides the latest fixes to Microsoft Filter Pack 2.0 64-Bit Edition. Additionally, this update contains stability and performance improvements.

13/03/2014 Update for Microsoft Office 2010 (KB2878225) 64-Bit Edition

Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

13/03/2014 Security Update for Microsoft Silverlight (KB2932677)

This security update to Silverlight includes fixes outlined in KB 2932677. This update is backward compatible with web applications built using previous versions of Silverlight.

13/03/2014 Security Update for Windows Vista for x64-based Systems (KB2930275)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

13/03/2014 Definition Update for Microsoft Office 2010 (KB982726) 64-Bit Edition

This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 64-Bit Edition.

12/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.1792.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

11/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.1702.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

10/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.1579.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

9/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.1523.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

6/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.1334.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

5/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.1238.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

4/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.1131.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

2/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.996.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

1/03/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.949.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

1/03/2014 Security Update for Microsoft .NET Framework 4.5.1 on Windows 7, Vista, Server 2008, and Server 2008 R2 for x64 (KB2898869)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your

system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

1/03/2014 Security Update for Microsoft .NET Framework 4.5.1 on Windows 7, Vista, Server 2008, and Server 2008 R2 for x64 (KB2901126)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

28/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.868.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

27/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.759.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

27/02/2014 Microsoft .NET Framework 4.5.1 for Windows Vista x64-based Systems (KB2858725)

The Microsoft .NET Framework 4.5.1 is a highly compatible, in-place update to the .NET Framework 4 and 4.5. By using the .NET Framework 4.5.1 together with the C# or Visual Basic programming languages, you can write Windows Store apps. The .NET Framework 4.5.1 delivers better performance, reliability, and security than previous versions. After you install this update, you may have to restart your computer.

26/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.675.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

24/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.523.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

22/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.434.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

21/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.375.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

20/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.275.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

19/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.188.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

18/02/2014 Windows Malicious Software Removal Tool x64 - February 2014 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

17/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.167.11.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.

16/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.4194.0)

Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software.

- Once you have installed this item, it cannot be removed.
- [14/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 \(Definition 1.165.4099.0\)](#)
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- [14/02/2014 Update for Microsoft InfoPath 2010 \(KB2817369\) 64-Bit Edition](#)
Microsoft has released an update for Microsoft InfoPath 2010 64-Bit Edition. This update provides the latest fixes to Microsoft InfoPath 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- [14/02/2014 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 \(KB2901110\)](#)
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- [14/02/2014 Security Update for Windows Vista for x64-based Systems \(KB2916036\)](#)
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- [14/02/2014 Cumulative Security Update for Internet Explorer 9 for Windows Vista for x64-based Systems \(KB2909921\)](#)
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- [14/02/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 \(KB2901113\)](#)
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- [14/02/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 \(KB2898858\)](#)
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- [14/02/2014 Update for Microsoft PowerPoint 2010 \(KB2775360\) 64-Bit Edition](#)
Microsoft has released an update for Microsoft PowerPoint 2010 64-Bit Edition. This update provides the latest fixes to Microsoft PowerPoint 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- [14/02/2014 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 \(KB2911502\)](#)
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

Microsoft has released an update for Microsoft InfoPath 2010 64-Bit Edition. This update provides the latest fixes to Microsoft InfoPath 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- [14/02/2014 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 \(KB2898855\)](#)
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- [14/02/2014 Update for Microsoft SharePoint Workspace 2010 \(KB2760601\) 64-Bit Edition](#)
Microsoft has released an update for Microsoft SharePoint Workspace 2010 64-Bit Edition. This update provides the latest fixes to Microsoft SharePoint Workspace 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.

- 14/02/2014 Update for Microsoft Outlook 2010 (KB2687567) 64-Bit Edition**
Microsoft has released an update for Microsoft Outlook 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Outlook 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 14/02/2014 Update for Microsoft OneNote 2010 (KB2837595) 64-Bit Edition**
Microsoft has released an update for Microsoft OneNote 2010 64-Bit Edition. This update provides the latest fixes to Microsoft OneNote 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 14/02/2014 Update for Microsoft Office 2010 (KB2837583) 64-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 14/02/2014 Security Update for Windows Vista for x64-based Systems (KB2862973)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 13/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.4017.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 12/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3928.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 10/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3741.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 9/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3675.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 7/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3587.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 6/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3475.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 4/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3312.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 3/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3226.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 2/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3156.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 1/02/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3104.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 31/01/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.3030.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 29/01/2014 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.2870.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software.

- Once you have installed this item, it cannot be removed.
- [27/01/2014 Definition Update for Microsoft Security Essentials - KB2310138 \(Definition 1.165.2732.0\)](#)

Microsoft has released an update for Microsoft Word 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Word 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 20/12/2013 Security Update for Microsoft Office 2010 (KB2826023) 64-Bit Edition**
A security vulnerability exists in Microsoft Office 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 20/12/2013 Update for Microsoft Office 2010 (KB2597087) 64-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 20/12/2013 Update for Microsoft Office 2010 (KB2589298) 64-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 20/12/2013 Update for Microsoft Office 2010 (KB2850079) 64-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 64-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 20/12/2013 Update for Microsoft Office 2010 (KB2553092), 64-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 System, 64-Bit Edition. This update decreases installation failures for updates installed on Microsoft Office 2010 System.
- 20/12/2013 Security Update for Microsoft Outlook 2010 (KB2837597) 64-Bit Edition**
A security vulnerability exists in Microsoft Outlook 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 20/12/2013 Update for Microsoft Filter Pack 2.0 (KB2810071) 64-Bit Edition**
Microsoft has released an update for Microsoft Filter Pack 2.0 64-Bit Edition. This update provides the latest fixes to Microsoft Filter Pack 2.0 64-Bit Edition. Additionally, this update contains stability and performance improvements.
- 20/12/2013 Security Update for Microsoft Office 2010 (KB2826035) 64-Bit Edition**
A security vulnerability exists in Microsoft Office 2010 64-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 19/12/2013 Definition Update for Microsoft Security Essentials - KB2310138 (Definition 1.165.235.0)**
Install this update to revise the definition files that are used to detect viruses, spyware, and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 19/12/2013 Security Update for Windows Vista for x64-based Systems (KB2855844)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 19/12/2013 Microsoft Silverlight (KB2636927)**
Microsoft Silverlight is a Web browser plug-in for Windows and Mac OS X that delivers high quality video/audio, animation, and richer Website experiences in popular Web browsers.
- 19/12/2013 TOSHIBA - Other hardware - Bluetooth ACPI**
TOSHIBA Other hardware software update released in August, 2009
- 19/12/2013 Update for Windows Vista for x64-based Systems (KB2522422)**
Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information.

- After you install this item, you may have to restart your computer.
- 18/12/2013 Update for Internet Explorer for Windows Vista for x64-based Systems (KB2467659)**
Install this update to resolve issues in Internet Explorer. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.
- 18/12/2013 Security Update for Microsoft Outlook 2010 (KB2837597) 32-Bit Edition**
A security vulnerability exists in Microsoft Outlook 2010 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2698365)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2859537)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2803821)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2685939)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Platform Update for Windows Vista x64-based Systems (KB971644)**
The Platform Update for Windows Vista is a collection of runtime libraries that make it easy for developers to target a wider customer base. After you install this item, you may have to restart your computer.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2862152)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Update for Windows Vista for x64-based Systems (KB2505189)**
Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2727528)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2654428)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2840149)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2789646)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 3.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2832412)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2742595)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2729453)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista Service Pack 2 for x64-based Systems (KB979688)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2876284)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Update for Windows Mail Junk E-mail Filter for x64-based Systems [April 2012] (KB905866)

Install this update for Windows Mail to revise the definition files that are used to detect e-mail messages that should be considered junk e-mail or that may contain phishing content. After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2863253)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Update for Microsoft Visio Viewer 2010 (KB2810066) 32-Bit Edition

Microsoft has released an update for Microsoft Visio Viewer 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Visio Viewer 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2621440)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2861855)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2884256)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2813430)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install

- this update, you may have to restart your system.
- 18/12/2013 Security Update for Microsoft Office 2010 (KB2850016) 32-Bit Edition**
A security vulnerability exists in Microsoft Office 2010 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 18/12/2013 Update for Microsoft Office 2010 (KB2760598) 32-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2845187)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Microsoft .NET Framework 3.5 SP1 on Windows XP, Server 2003, Vista, and Server 2008 for x64 (KB2604111)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2835364)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Server 2008 for x64 (KB2861188)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Update for Microsoft Office 2010 (KB2826026) 32-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2785220)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain access to information. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2631813)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2893984)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2833947)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2758857)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Update for Microsoft .NET Framework 4 on Windows XP, Windows Server 2003, Windows Vista, Windows 7, Windows Server 2008, Windows Server 2008 R2 for x64-based Systems (KB2468871)**
Install this update to resolve issues in Microsoft .NET Framework

4. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Microsoft .NET Framework 3.5 SP1 on Windows XP, Server 2003, Vista, and Server 2008 for x64 (KB2736416)

A security issue has been identified that could allow an unauthenticated remote attacker to cause the affected application to stop responding. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Update for Windows Vista for x64-based Systems (KB2808679)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2849470)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Update for Microsoft Office 2010 (KB2589352) 32-Bit Edition

Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Update for Microsoft Office 2010 (KB2589375) 32-Bit Edition

Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Update for Microsoft OneNote 2010 (KB2810072) 32-Bit Edition

Microsoft has released an update for Microsoft OneNote 2010 32-Bit Edition. This update provides the latest fixes to Microsoft OneNote 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2847311)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2737019)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2868038)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Cumulative Security Update for Internet Explorer 7 for Windows Vista for x64-based Systems (KB2898785)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Update for Microsoft Filter Pack 2.0 (KB2810071) 32-Bit Edition

Microsoft has released an update for Microsoft Filter Pack 2.0 32-Bit Edition. This update provides the latest fixes to Microsoft Filter Pack 2.0 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Update for Microsoft Office 2010 (KB2589298) 32-Bit Edition

Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Platform Update Supplement for Windows Vista for x64-based Systems (KB2117917)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the

associated Microsoft Knowledge Base article for more information.

After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2564958)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Update for Windows Vista for x64-based Systems (KB2563227)

Install this update to resolve performance and reliability issues in Windows. By applying this update, you can achieve better performance and responsiveness in various scenarios. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2585542)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain access to information. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2598479)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2868626)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2789642)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Update for Microsoft PowerPoint 2010 (KB2553145) 32-Bit Edition

Microsoft has released an update for Microsoft PowerPoint 2010 32-Bit Edition. This update provides the latest fixes to Microsoft PowerPoint 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2840628)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2570947)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 3.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2756919)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2862335)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Update for Windows Driver Framework version 1.11 for Windows Vista x64 Edition (KB2761494)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/12/2013 Update for Windows Vista for x64-based Systems (KB2748349)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information.

After you install this item, you may have to restart your computer.

18/12/2013 Microsoft .NET Framework 3.5 SP1, Windows Vista SP2, and Windows Server 2008 SP2 Update for x64-based Systems (KB982525)

This update addresses a set of known issues of the Microsoft .NET Framework 3.5 Service Pack 1. After you install this item, you may have to restart your computer.

18/12/2013 Update for Windows Vista for x64-based Systems (KB2718704)

Install this update to resolve an issue which requires an update to the certificate revocation list on Windows systems and to keep your systems certificate list up to date. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2901674)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2868623)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Windows Internet Explorer 9 for Windows Vista for x64-based systems

Windows Internet Explorer 9 delivers web sites and applications that look and perform like native PC applications through the power of Windows. Fast: Internet Explorer 9 is all-around fast. Designed to take full advantage of your PC's hardware through Windows, Internet Explorer 9 delivers graphically rich and immersive experiences that are as fast and responsive as native applications installed on your PC. Clean: Internet Explorer puts the focus on the Web sites you love with a clean look and increased viewing area that makes your Web sites shine. Intuitive and seamless integration with Windows Vista provides one-click access to Web applications pinned directly to your Taskbar. Trusted: Internet Explorer is the trusted way to the Web because it has a robust set of built-in security, privacy and reliability technologies that keep you safer and your browsing experience uninterrupted. Interoperable: Support for HTML5 and modern Web standards architected to take advantage of the GPU means that the same mark-up not only works across the Web, but runs faster and delivers a richer experience through Windows and Internet Explorer 9.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2619339)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2604094)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Update for Windows Vista for x64-based Systems (KB2545698)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information.

After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Microsoft Office 2010 (KB2826023) 32-Bit Edition

A security vulnerability exists in Microsoft Office 2010 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2532531)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft Excel 2010 (KB2826033) 32-Bit Edition

A security vulnerability exists in Microsoft Excel 2010 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2729449)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2604121)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft Office 2010 (KB2687423) 32-Bit Edition

A security vulnerability exists in Microsoft Office 2010 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

18/12/2013 Cumulative Security Update for ActiveX Killbits for Windows Vista for x64-based Systems (KB2900986)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Microsoft .NET Framework 3.5 SP1, Windows Vista SP2, and Windows Server 2008 SP2 Update for x64-based Systems (KB982536)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2864063)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2807986)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2892075)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2655992)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain access to information. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 3.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2861190)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2620704)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2876331)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2757638)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to

restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2858302)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2862966)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 3.5 SP1 on Windows XP, Server 2003, Vista, and Server 2008 for x64 (KB2840629)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2835393)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2864058)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Update for Windows Vista for x64-based Systems (KB2763674)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2893294)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2875783)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2712808)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Update for Microsoft Office 2010 (KB2597087) 32-Bit Edition

Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Update for Microsoft Word 2010 (KB2837593) 32-Bit Edition

Microsoft has released an update for Microsoft Word 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Word 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2864202)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

- 18/12/2013 Update for Windows Vista for x64-based Systems (KB960362)**
The Windows Ribbon and Animation Manager Library contains the Windows Ribbon API, a command framework that enables developers to quickly and easily create rich ribbon experiences in their applications, and the Windows Animation Manager API, an animation framework for managing the scheduling and execution of user interface element animations. After you install this item, you may have to restart your computer.
- 18/12/2013 Update for Windows Vista for x64-based Systems (KB2863058)**
Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.
- 18/12/2013 Security Update for Microsoft Office 2010 (KB2826035) 32-Bit Edition**
A security vulnerability exists in Microsoft Office 2010 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2705219)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2653956)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Microsoft .NET Framework 3.5 SP1 on Windows XP, Server 2003, Vista and Server 2008 for x64 (KB2861697)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2820917)**
A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.
- 18/12/2013 Definition Update for Microsoft Office 2010 (KB982726) 32-Bit Edition**
This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 32-Bit Edition.
- 18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2780091)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/12/2013 Windows Malicious Software Removal Tool x64 - December 2013 (KB890830)**
After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.
- 18/12/2013 Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2836939)**
Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.
- 18/12/2013 Update for Microsoft .NET Framework 4 on Windows XP, Windows Server 2003, Windows Vista, Windows 7, Windows Server 2008, Windows Server 2008 R2 for x64-based Systems (KB2533523)**
This update addresses stability, reliability, and performance issues in Microsoft .NET Framework 4. After you install this item, you may have to restart your computer.
- 18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2742601)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over

it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2584146)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Update for Microsoft Office 2010 (KB2794737) 32-Bit Edition

Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2862330)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft Office 2010 (KB2553284) 32-Bit Edition

A security vulnerability exists in Microsoft Office 2010 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

18/12/2013 Update for Microsoft .NET Framework 4 on XP, Server 2003, Vista, Windows 7, Server 2008, Server 2008 R2 for x64 (KB2600217)

This update addresses stability, reliability, and performance issues in Microsoft .NET Framework 4. After you install this item, you may have to restart your computer.

18/12/2013 Update for Microsoft Access 2010 (KB2553446) 32-Bit Edition

Microsoft has released an update for Microsoft Access 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Access 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2887069)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2690533)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2813345)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2834886)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2844287)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Microsoft .NET Framework 2.0 SP2 on Windows Vista SP2 and Windows Server 2008 SP2 for x64 (KB2656362)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/12/2013 Security Update for Windows Vista for x64-based Systems (KB2579686)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update

from Microsoft. After you install this update, you may have to restart your system.

[18/12/2013 Security Update for Windows Vista Media Center TVPack 2008 for x64-based Systems \(KB2579692\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/12/2013 Security Update for Windows Vista for x64-based Systems \(KB2839894\)](#)

A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.

[18/12/2013 Security Update for Windows Vista for x64-based Systems \(KB2691442\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/12/2013 Update for Microsoft Office 2010 \(KB2850079\) 32-Bit Edition](#)

Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

[18/12/2013 Security Update for Windows Vista for x64-based Systems \(KB2676562\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.

[16/12/2013 Service Pack 2 for Microsoft Office 2010 \(KB2687455\) 32-Bit Edition](#)

Service Pack 2 (SP2) for Microsoft Office 2010 32-Bit Edition contains new updates which improve security, performance, and stability. Additionally, the SP is a roll-up of all previously released updates.

[16/12/2013 Update for Office File Validation 2010 \(KB2553065\), 32-bit Edition](#)

Microsoft has released an update for Microsoft Office File Validation 2010, 32-bit Edition. This update provides the latest fixes to Microsoft Office File Validation 2010, 32-bit Edition. Additionally, this update contains stability and performance improvements.

[16/12/2013 Security Update for Microsoft SharePoint Workspace 2010 \(KB2566445\), 32-Bit Edition](#)

A security vulnerability exists in Microsoft SharePoint Workspace 2010, 32-Bit Edition that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

[16/12/2013 Update for Microsoft Office 2010 \(KB2553310\) 32-Bit Edition](#)

Microsoft has released an update for Microsoft Office 2010 32-Bit

- Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.
- 16/12/2013 Update for Microsoft OneNote 2010 (KB2553290) 32-Bit Edition**
Microsoft has released an update for Microsoft OneNote 2010 32-Bit Edition. This update provides the latest fixes to Microsoft OneNote 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.
- 16/12/2013 Definition Update for Microsoft Office 2010 (KB982726) 32-Bit Edition**
This update provides the latest junk email and malicious links filter definitions for Microsoft Office 2010 32-Bit Edition.
- 16/12/2013 Update for Microsoft Outlook Social Connector 2010 (KB2553406) 32-Bit Edition**
Microsoft has released an update for Microsoft Outlook Social Connector 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Outlook Social Connector 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.
- 16/12/2013 Update for Microsoft Office 2010 (KB2598242) 32-Bit Edition**
Microsoft has released an update for Microsoft Office 2010 32-Bit Edition. This update provides the latest fixes to Microsoft Office 2010 32-Bit Edition. Additionally, this update contains stability and performance improvements.
- 13/12/2013 Definition Update for Windows Defender - KB915597 (Definition 1.163.1876.0)**
Install this update to revise the definition files used to detect spyware and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 12/12/2013 Definition Update for Windows Defender - KB915597 (Definition 1.163.1607.0)**
Install this update to revise the definition files used to detect spyware and other potentially unwanted software. Once you have installed this item, it cannot be removed.
- 12/12/2013 Security Update for Microsoft Office 2007 suites (KB2817641)**
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 12/12/2013 Security Update for Microsoft Office 2007 suites (KB2850022)**
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 23/11/2013 Windows Vista Service Pack 2 for x64-based Systems (KB948465)**
Windows Vista Service Pack 2 is an update to Windows Vista that includes all of the updates that have been delivered since Service Pack 1, as well as support for new types of hardware and emerging hardware standards. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.
- 15/11/2013 Security Update for Microsoft Office 2007 suites (KB2760415)**
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 4/11/2013 Windows Vista Service Pack 2 for x64-based Systems (KB948465)**
Windows Vista Service Pack 2 is an update to Windows Vista that includes all of the updates that have been delivered since Service Pack 1, as well as support for new types of hardware and emerging hardware standards. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.
- 17/10/2013 Security Update for Microsoft Office Word 2007 (KB2827330)**
A security vulnerability exists in Microsoft Office Word 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 17/10/2013 Security Update for Microsoft Office 2007 suites (KB2760585)**
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 17/10/2013 Security Update for Microsoft Office 2007 suites (KB2827326)**
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 17/10/2013 Security Update for Microsoft Office 2007 suites (KB2760591)**
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 17/10/2013 Security Update for Microsoft Office Excel 2007 (KB2827324)**
A security vulnerability exists in Microsoft Office Excel 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 17/10/2013 Security Update for Microsoft Office 2007 suites (KB2827329)**
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- 14/09/2013 Security Update for Microsoft Office 2007 suites (KB2760588)**

- A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- [14/09/2013 Security Update for Microsoft Office 2007 suites \(KB2760823\)](#)
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

- [12/07/2013 Security Update for Microsoft Office 2007 suites \(KB2687309\)](#)
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- [30/06/2013 Windows Vista Service Pack 2 for x64-based Systems \(KB948465\)](#)
Windows Vista Service Pack 2 is an update to Windows Vista that includes all of the updates that have been delivered since Service

Pack 1, as well as support for new types of hardware and emerging hardware standards. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.

22/06/2013 Windows Vista Service Pack 2 for x64-based Systems (KB948465)

Windows Vista Service Pack 2 is an update to Windows Vista that includes all of the updates that have been delivered since Service Pack 1, as well as support for new types of hardware and emerging hardware standards. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.

22/06/2013 Security Update for Microsoft Visual C++ 2010 Service Pack 1 Redistributable Package (KB2565063)

A security issue has been identified leading to MFC application vulnerability in DLL planting due to MFC not specifying the full path to system/localization DLLs. You can protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

27/05/2013 Security Update for Microsoft .NET Framework 4 on Windows XP, Windows Server 2003, Windows Vista, Windows 7, Windows Server 2008, Windows Server 2008 R2 for x64-based Systems (KB2518870)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft.

After you install this item, you may have to restart your computer.

27/05/2013 Security Update for Microsoft .NET Framework 4 on Windows XP, Windows Server 2003, Windows Vista, Windows 7, Windows Server 2008, Windows Server 2008 R2 for x64-based Systems (KB2478663)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft.

After you install this item, you may have to restart your computer.

26/05/2013 Microsoft .NET Framework 4 Client Profile for Windows Vista x64-based Systems (KB982670)

The Microsoft .NET Framework 4 Client Profile provides a subset of features from the .NET Framework 4. The Client Profile is designed to run client applications and to enable the fastest possible deployment for Windows Presentation Foundation (WPF) and Windows Forms technology.

25/05/2013 Security Update for Windows Media Format Runtime 11 for Windows Vista for x64-based Systems (KB968816)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

25/05/2013 Security Update for Windows Vista for x64-based Systems (KB975467)

A security issue has been identified that could allow an unauthenticated remote attacker to cause the affected system to stop responding. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

24/05/2013 Update for Windows Vista for x64-based Systems (KB955430)

Install this update to enable future updates to install successfully on all editions of Windows Vista. This update may be required before selected future updates can be installed. After you install this item, it cannot be removed. This update is provided to you and licensed under the Windows Vista License Terms.

24/05/2013 Update for Windows Vista for x64-based Systems (KB955430)

Install this update to enable future updates to install successfully on all editions of Windows Vista. This update may be required before selected future updates can be installed. After you install this item, it cannot be removed. This update is provided to you and licensed under the Windows Vista License Terms.

23/05/2013 Microsoft .NET Framework 3.5 SP1 Update for Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB982535)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

23/05/2013 Microsoft .NET Framework 3.5 SP1 Security Update for Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB979911)

A security issue has been identified that could allow an attacker to tamper with digitally signed content without being detected, when this content is being consumed by an application that makes use of the Microsoft .NET Framework on a Windows-based system. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

23/05/2013 Update for Microsoft Office 2007 suites (KB2596620)

Microsoft has released an update for Microsoft Office 2007 suites . This update provides the latest fixes to Microsoft Office 2007 suites . Additionally, this update contains stability and performance improvements.

23/05/2013 Security Update for Microsoft Office PowerPoint 2007 (KB2596764)

A security vulnerability exists in Microsoft Office PowerPoint 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for Microsoft Office 2007 suites (KB2596744)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for .NET Framework 3.5 SP1 on Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB2518865)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

23/05/2013 Update for Microsoft Office 2007 suites (KB2687493)

Microsoft has released an update for Microsoft Office 2007 suites . This update provides the latest fixes to Microsoft Office 2007 suites . Additionally, this update contains stability and performance improvements.

23/05/2013 Security Update for Microsoft .NET Framework 3.5 SP1 on Windows XP, Windows Server 2003, Windows Vista, Windows Server 2008 for x64-based Systems (KB2416473)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain access to information. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

23/05/2013 Update for Microsoft Office 2007 suites (KB2596660)

Microsoft has released an update for Microsoft Office 2007 suites . This update provides the latest fixes to Microsoft Office 2007 suites . Additionally, this update contains stability and performance improvements.

23/05/2013 Security Update for Microsoft Office 2007 suites (KB2687441)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Update to .NET Framework 3.5 Service Pack 1 for the .NET Framework Assistant 1.0 x64 (KB963707)

The update to .NET Framework 3.5 Service Pack 1 for the .NET Framework Assistant 1.0 for Firefox addresses several compatibility issues with version 1.0 of the extension.

23/05/2013 Security Update for Microsoft Office PowerPoint 2007 (KB2596912)

A security vulnerability exists in Microsoft Office PowerPoint 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for Microsoft Office 2007 suites (KB2596871)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for Microsoft Office 2007 suites (KB2596754)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Microsoft .NET Framework 3.5 SP1 Update for Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB956250)

This update addresses a set of known issues of the Microsoft .NET Framework 3.5 Service Pack 1. After you install this item, you may have to restart your computer.

23/05/2013 Security Update for Microsoft Office Excel 2007 (KB2687307)

A security vulnerability exists in Microsoft Office Excel 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for Microsoft Office 2007 suites (KB2597969)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for Microsoft Office 2007 suites (KB2596792)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for Microsoft .NET Framework 3.5 SP1 on Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB2416474)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain access to information. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

23/05/2013 Security Update for .NET Framework 3.5 SP1 on Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB2478659)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

23/05/2013 Security Update for Microsoft Office InfoPath 2007 (KB2687440)

A security vulnerability exists in Microsoft Office InfoPath 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

23/05/2013 Security Update for Microsoft Office Word 2007 (KB2760421)

A security vulnerability exists in Microsoft Office Word 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

22/05/2013 Security Update for Microsoft Office 2007 suites (KB2596615)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

22/05/2013 Security Update for Microsoft Office 2007 suites (KB2760416)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

21/05/2013 Update for Windows Vista for x64-based Systems (KB971737)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

21/05/2013 Security Update for Microsoft Office PowerPoint 2007 (KB2596843)

A security vulnerability exists in Microsoft Office PowerPoint 2007 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

21/05/2013 Security Update for Microsoft Office 2007 suites (KB2687499)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

21/05/2013 Update for Microsoft XML Core Services 4.0 Service Pack 2 for x64-based Systems (KB973688)

Install this update to prevent applications from sending too many HTTP requests while a well-known Document Type Definition (DTD) is included. After you install this item, you may have to restart your computer. Once you have installed this item, it cannot be removed.

21/05/2013 Update for Microsoft Office PowerPoint 2007 Help (KB963669)

This update installs the latest assistance content for the Microsoft Office PowerPoint 2007 Help file and the Office PowerPoint 2007 Developer Help file.

21/05/2013 Security Update for Microsoft XML Core Services 4.0 Service Pack 2 for x64-based Systems (KB954430)

A security issue has been identified in Microsoft XML Core Services (MSXML) that could allow an attacker to compromise your Windows-based system and gain control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer. Once you have installed this item, it cannot be removed.

21/05/2013 Cumulative Update for Media Center TVPack for Windows Vista for x64-based Systems (KB977864)

Install this update to resolve issues with Media Center TVPack for Windows Vista. For a complete listing of the issues that are included in this cumulative update, see Microsoft Knowledge Base article 977864. After you install this item, you may have to restart your computer.

21/05/2013 Security Update for Microsoft Office 2007 suites (KB2687311)

A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

21/05/2013 Update for Windows Vista for x64-based Systems (KB970430)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

21/05/2013 Microsoft .NET Framework 3.5 Service Pack 1 and .NET Framework 3.5 Family Update (KB951847) x64

The Microsoft .NET Framework 3.5 Service Pack 1 is a full cumulative update that contains many new features building incrementally upon .NET Framework 2.0, 3.0, 3.5, and includes cumulative servicing updates to the .NET Framework 2.0 and the .NET Framework 3.0 subcomponents. The .NET Framework 3.5 Family Update provides important application compatibility updates. This update is provided to you and licensed under the Windows Vista and Windows Server 2008 License Terms.

21/05/2013 Update for Microsoft Office Word 2007 Help (KB963665)

This update installs the latest assistance content for the Microsoft

- Office Word 2007 Help file and the Office Word 2007 Developer Help file.
- [21/05/2013 Security Update for Microsoft Office 2007 suites \(KB2596672\)](#)
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- [21/05/2013 Update for Microsoft Office Excel 2007 Help \(KB963678\)](#)
This update installs the latest assistance content for the Microsoft Office Excel 2007 Help file and the Office Excel 2007 Developer Help file.
- [21/05/2013 Update for Microsoft Office 2007 suites \(KB2596848\)](#)
Microsoft has released an update for Microsoft Office 2007 suites . This update provides the latest fixes to Microsoft Office 2007 suites . Additionally, this update contains stability and performance improvements.
- [21/05/2013 Windows PowerShell 2.0 and WinRM 2.0 for Windows Vista for x64-based Systems \(KB968930\)](#)
The Windows Management Framework Core package includes Windows PowerShell 2.0 and Windows Remote Management (WinRM) 2.0. For more information on the Windows Management Framework, see <http://support.microsoft.com/kb/968929>.
- [21/05/2013 Update for Windows Vista for x64-based Systems \(KB2345886\)](#)
Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.
- [21/05/2013 Security Update for Microsoft Office 2007 suites \(KB2596785\)](#)
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- [21/05/2013 The 2007 Microsoft Office Suite Service Pack 3 \(SP3\)](#)
Service Pack 3 provides the latest updates to the 2007 Microsoft Office Suite. This update also applies to Microsoft Office Project, Microsoft Office SharePoint Designer, Microsoft Office Visio, and Visual Web Developer.
- [21/05/2013 PowerPoint Viewer 2007 Service Pack 3 \(SP3\)](#)
Service Pack 3 provides the latest updates to PowerPoint Viewer 2007.
- [21/05/2013 Security Update for Microsoft Office 2007 suites \(KB2596615\)](#)
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- [21/05/2013 Security Update for Microsoft Office 2007 suites \(KB2760416\)](#)
A security vulnerability exists in Microsoft Office 2007 suites that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.
- [18/05/2013 Update for Windows Vista for x64-based Systems \(KB972145\)](#)
Install this update to resolve a compliance issue with Windows Media Player and Set Program Access and Computer Defaults. After you install this item, you may have to restart your computer.
- [18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB978886\)](#)
A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- [18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB979687\)](#)
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- [18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB975560\)](#)
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- [18/05/2013 Security Update for Windows Desktop Search 4.0 for Windows Vista for x64-based Systems \(KB979688\)](#)
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- [18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2387149\)](#)
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- [18/05/2013 Update for Microsoft Office OneNote 2007 Help \(KB963670\)](#)

This update installs the latest assistance content for the Microsoft Office OneNote 2007 Help file.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2508429)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB972270)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Microsoft .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 Security Update for x64-based Systems (KB979913)

A security issue has been identified that could allow an attacker to tamper with digitally signed content without being detected, when this content is being consumed by an application that makes use of the Microsoft .NET Framework on a Windows-based system. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Cumulative Security Update for Internet Explorer 7 for Windows Vista for x64-based Systems (KB2530548)

Security issues have been identified that could allow an attacker to compromise a system that is running Microsoft Internet Explorer and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB961501)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system. This update is provided to you and licensed under the Windows Vista License Terms.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB970238)

A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system. This update is provided to you and licensed under the Windows Vista License Terms.

18/05/2013 Update for Windows Vista for x64-based Systems (KB968389)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB978338)

A security issue has been identified that could allow an attacker to misrepresent a system action or behavior without the knowledge of the user. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista Media Center TVPack 2008 for x64-based Systems (KB2628642)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB973565)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Media Format Runtime 11 for Windows Vista for x64-based Systems (KB954155)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Microsoft .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 for x64-based Systems (KB2416469)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain access to information. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

- 18/05/2013 Update for Windows Vista for x64-based Systems (KB2524375)**
Install this update to resolve an issue which requires an update to the certificate revocation list on Windows systems and to keep your systems certificate list up to date. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB979482)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB973768)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2476490)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB982132)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2296011)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2412687)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Cumulative Security Update for ActiveX Killbits for Windows Vista for x64-based Systems (KB2508272)**
Security issues have been identified in ActiveX controls that could allow an attacker to compromise a system running Microsoft Internet Explorer and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this item, you may have to restart your computer.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB974318)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Update for Windows Vista for x64-based Systems (KB2533623)**
Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB982799)**
A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB975558)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2347290)**
A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.
- 18/05/2013 Security Update for Windows Vista for x64-based Systems (KB982665)**
A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update

from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista Media Center TVPack 2008 for x64-based Systems \(KB2494132\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2555917\)](#)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2536275\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to cause the affected system to stop responding. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 for x64-based Systems \(KB2518863\)](#)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

[18/05/2013 Update for the 2007 Microsoft Office System Help for Common Features \(KB963673\)](#)

This update installs the latest assistance content for the Microsoft Office 2007 Help file.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2503665\)](#)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Update for Windows Vista for x64-based Systems \(KB959108\)](#)

Install this update to resolve an issue with the Microsoft Customer Experience Improvement Program. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.

[18/05/2013 Update for Windows Vista for x64-based Systems \(KB973687\)](#)

Install this update to prevent applications from sending too many HTTP requests while a well-known Document Type Definition (DTD) is included. After you install this item, you may have to restart your computer.

[18/05/2013 Microsoft Browser Choice Screen Update for EEA Users of Windows Vista for x64-based Systems \(KB976002\)](#)

Install this update to access a Choice Screen which lets you select whether and which Web browser(s) to install in addition to Internet Explorer. After you have installed this software update it cannot be removed.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2419640\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2483185\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Update for Windows Vista for x64-based Systems \(KB976470\)](#)

Install this update to resolve an issue in which the "Date and Time" window of Control Panel will incorrectly display an error message. After you install this item, you may have to restart your computer.

[18/05/2013 Update for the 2007 Microsoft Office System \(KB967642\)](#)

This update fixes an error that may occur when installing the Microsoft Office suite Service Packs.

[18/05/2013 Update for Windows Vista for x64-based Systems \(KB973917\)](#)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2378111)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Rights Management Services Client for Windows Vista for x64-based Systems (KB979099)

Install this update to resolve issues caused by manifest expiration in AD RMS enabled applications. This update will fix any existing issues in addition to addressing any future application manifest expirations. After you install this item, you may have to restart any running AD RMS enabled applications.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2506014)

An issue has been identified that could allow a user with administrative permissions to load an unsigned driver. This update resolves that issue. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2442962)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Microsoft Works 9 (KB2754670)

A security vulnerability exists in Microsoft Works 9 that could allow arbitrary code to run when a maliciously modified file is opened. This update resolves that vulnerability.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2481109)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB971029)

Install this update to restrict AutoRun entries in the AutoPlay dialog to only CD and DVD drives. After you install this item, you may have to restart your computer.

18/05/2013 Cumulative Update for Media Center for Windows Vista for x64-based Systems (KB982480)

Install this update to resolve issues with Media Center for Windows Vista. For a complete listing of the issues that are included in this cumulative update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/05/2013 Update for Windows Vista for x64-based Systems (KB980248)

Install this update to remove the Windows File Protection from applicable Windows font files. This update is necessary so the Office 2010 installer can update the fonts. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2510581)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB975929)

Both the Meiryo UI font and the Meiryo UI Bold font are included in this update. These new fonts let an application optimally display Kana characters in the Ribbon UI component and in other parts of the user interface, especially in areas where text area is limited. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB979309)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB978542)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Microsoft Office Compatibility Pack Service Pack 3 (SP3)

Service Pack 3 provides the latest updates to the Microsoft Office

Compatibility Pack.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2511455\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2479943\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB981997\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB967723\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 for x64-based Systems \(KB2478657\)](#)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2535512\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2079403\)](#)

A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB975562\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Update for Windows Vista for x64-based Systems \(KB2541763\)](#)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

[18/05/2013 Security Update for Windows Vista for x64-based Systems \(KB2544893\)](#)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain access to information. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

[18/05/2013 Update for Windows Vista for x64-based Systems \(KB2492386\)](#)

Install this update to resolve a set of known application compatibility issues with Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB974571)

A security issue has been identified that could allow an attacker to misrepresent a system action or behavior without the knowledge of the user. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Internet Explorer 7 for Windows Vista for x64-based Systems (KB2544521)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB971657)

A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2393802)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB978601)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2478935)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2423089)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2507618)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2443685)

Install this update to resolve issues caused by revised daylight saving time and time zone laws in several countries. This update enables your computer to automatically adjust the computer clock on the correct date in 2011. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB977816)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2507938)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Microsoft Visual C++ 2005 Service Pack 1 Redistributable Package (KB2538242)

A security issue has been identified leading to MFC application vulnerability in DLL planting due to MFC not specifying the full path to system/localization DLLs. You can protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB981322)

A security issue has been identified that could allow an unauthenticated

remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for .NET Framework 3.5 on Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB983587)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft.

After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB973540)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2506212)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Microsoft Office 2007 suites (KB2767916)

Microsoft has released an update for Microsoft Office 2007 suites . This update provides the latest fixes to Microsoft Office 2007 suites . Additionally, this update contains stability and performance improvements.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2207566)

A security issue has been identified that could allow an unauthenticated remote attacker to cause the affected system to stop responding. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Microsoft Script Editor Help (KB963671)

This update installs the latest assistance content for the Microsoft Script Editor Help file that is included with the 2007 Office System.

18/05/2013 Update for Windows Vista for x64-based Systems (KB957200)

This is a reliability update. This update resolves some performance and reliability issues in Windows Vista. By applying this update, you can achieve better performance and responsiveness in various scenarios. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2281679)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2509553)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB970710)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2305420)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Microsoft XML Core Services 4.0 Service Pack 2 for x64-based Systems (KB973688)

Install this update to prevent applications from sending too many HTTP requests while a well-known Document Type Definition (DTD) is included. After you install this item, you may have to restart your computer. Once you have installed this item, it cannot be removed.

18/05/2013 Security Update for Microsoft XML Core Services 4.0 Service Pack 2 for x64-based Systems (KB954430)

A security issue has been identified in Microsoft XML Core Services (MSXML) that could allow an attacker to compromise your Windows-based system and gain control over it. You can help protect your computer

by installing this update from Microsoft. After you install this item, you may have to restart your computer. Once you have installed this item, it cannot be removed.

18/05/2013 Microsoft .NET Framework 3.5 Service Pack 1 and .NET Framework 3.5 Family Update (KB951847) x64

The Microsoft .NET Framework 3.5 Service Pack 1 is a full cumulative update that contains many new features building incrementally upon .NET Framework 2.0, 3.0, 3.5, and includes cumulative servicing updates to the .NET Framework 2.0 and the .NET Framework 3.0 subcomponents. The .NET Framework 3.5 Family Update provides important application compatibility updates. This update is provided to you and licensed under the Windows Vista and Windows Server 2008 License Terms.

18/05/2013 Windows Malicious Software Removal Tool x64 - May 2013 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

18/05/2013 Update for Windows Vista for x64-based Systems (KB972145)

Install this update to resolve a compliance issue with Windows Media Player and Set Program Access and Computer Defaults. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB978886)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB979687)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB975560)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Desktop Search 4.0 for Windows Vista for x64-based Systems (KB979688)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2387149)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2508429)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB972270)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Microsoft .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 Security Update for x64-based Systems (KB979913)

A security issue has been identified that could allow an attacker to tamper with digitally signed content without being detected, when this content is being consumed by an application that makes use of the Microsoft .NET Framework on a Windows-based system. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Cumulative Security Update for Internet Explorer 7 for Windows Vista for x64-based Systems (KB2530548)

Security issues have been identified that could allow an attacker to compromise a system that is running Microsoft Internet Explorer and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB961501)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system. This update is provided to you and licensed under the Windows Vista License Terms.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB970238)

A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system. This update is provided to you and licensed under the Windows Vista License Terms.

18/05/2013 Update for Windows Vista for x64-based Systems (KB968389)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB978338)

A security issue has been identified that could allow an attacker to misrepresent a system action or behavior without the knowledge of the user. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista Media Center TVPack 2008 for x64-based Systems (KB2628642)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB973565)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Media Format Runtime 11 for Windows Vista for x64-based Systems (KB954155)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Microsoft .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 for x64-based Systems (KB2416469)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain access to information. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2524375)

Install this update to resolve an issue which requires an update to the certificate revocation list on Windows systems and to keep your systems certificate list up to date. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB979482)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB973768)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2476490)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB982132)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2296011)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2412687)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Cumulative Security Update for ActiveX Killbits for Windows Vista for x64-based Systems (KB2508272)

Security issues have been identified in ActiveX controls that could allow an attacker to compromise a system running Microsoft Internet Explorer and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB974318)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2533623)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB982799)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB975558)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Microsoft XML Core Services 4.0 Service Pack 2 for x64-based Systems (KB973688)

Install this update to prevent applications from sending too many HTTP requests while a well-known Document Type Definition (DTD) is included. After you install this item, you may have to restart your computer. Once you have installed this item, it cannot be removed.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2347290)

A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB982665)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista Media Center TVPack 2008 for x64-based Systems (KB2494132)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2555917)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Microsoft XML Core Services 4.0 Service Pack 2 for x64-based

Systems (KB954430)

A security issue has been identified in Microsoft XML Core Services (MSXML) that could allow an attacker to compromise your Windows-based system and gain control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer. Once you have installed this item, it cannot be removed.

18/05/2013 Cumulative Update for Media Center TVPack for Windows Vista for x64-based Systems (KB977864)

Install this update to resolve issues with Media Center TVPack for Windows Vista. For a complete listing of the issues that are included in this cumulative update, see Microsoft Knowledge Base article 977864. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2536275)

A security issue has been identified that could allow an unauthenticated remote attacker to cause the affected system to stop responding. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2536276)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 for x64-based Systems (KB2518863)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2503665)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB959108)

Install this update to resolve an issue with the Microsoft Customer Experience Improvement Program. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.

18/05/2013 Microsoft .NET Framework 3.5 Service Pack 1 and .NET Framework 3.5 Family Update (KB951847) x64

The Microsoft .NET Framework 3.5 Service Pack 1 is a full cumulative update that contains many new features building incrementally upon .NET Framework 2.0, 3.0, 3.5, and includes cumulative servicing updates to the .NET Framework 2.0 and the .NET Framework 3.0 subcomponents. The .NET Framework 3.5 Family Update provides important application compatibility updates. This update is provided to you and licensed under the Windows Vista and Windows Server 2008 License Terms.

18/05/2013 Update for Windows Vista for x64-based Systems (KB973687)

Install this update to prevent applications from sending too many HTTP requests while a well-known Document Type Definition (DTD) is included. After you install this item, you may have to restart your computer.

18/05/2013 Microsoft Browser Choice Screen Update for EEA Users of Windows Vista for x64-based Systems (KB976002)

Install this update to access a Choice Screen which lets you select whether and which Web browser(s) to install in addition to Internet Explorer. After you have installed this software update it cannot be removed.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2419640)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2483185)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB976470)

Install this update to resolve an issue in which the "Date and Time" window of Control Panel will incorrectly display an error message. After you install this item, you may have to restart

your computer.

18/05/2013 Update for Windows Vista for x64-based Systems (KB973917)

Install this update to help strengthen authentication credentials in specific scenarios. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2378111)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Rights Management Services Client for Windows Vista for x64-based Systems (KB979099)

Install this update to resolve issues caused by manifest expiration in AD RMS enabled applications. This update will fix any existing issues in addition to addressing any future application manifest expirations. After you install this item, you may have to restart any running AD RMS enabled applications.

18/05/2013 Windows Malicious Software Removal Tool x64 - May 2013 (KB890830)

After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2506014)

An issue has been identified that could allow a user with administrative permissions to load an unsigned driver. This update resolves that issue. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2442962)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2481109)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB971029)

Install this update to restrict AutoRun entries in the AutoPlay dialog to only CD and DVD drives. After you install this item, you may have to restart your computer.

18/05/2013 Cumulative Update for Media Center for Windows Vista for x64-based Systems (KB982480)

Install this update to resolve issues with Media Center for Windows Vista. For a complete listing of the issues that are included in this cumulative update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/05/2013 Update for Windows Vista for x64-based Systems (KB980248)

Install this update to remove the Windows File Protection from applicable Windows font files. This update is necessary so the Office 2010 installer can update the fonts. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2510581)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Windows PowerShell 2.0 and WinRM 2.0 for Windows Vista for x64-based Systems (KB968930)

The Windows Management Framework Core package includes Windows PowerShell 2.0 and Windows Remote Management (WinRM) 2.0. For more information on the Windows Management Framework, see <http://support.microsoft.com/kb/968929>.

18/05/2013 Update for Windows Vista for x64-based Systems (KB975929)

Both the Meiryo UI font and the Meiryo UI Bold font are included in this update. These new fonts let an application optimally display Kana characters in the Ribbon UI component and in other parts of the user interface, especially in areas where text area

is limited. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB979309)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB978542)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2511455)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2479943)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Media Format Runtime 11 for Windows Vista for x64-based Systems (KB968816)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB975467)

A security issue has been identified that could allow an unauthenticated remote attacker to cause the affected system to stop responding. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB973507)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB981997)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB967723)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for .NET Framework 3.5, Windows Vista SP1, and Windows Server 2008 for x64-based Systems (KB2478657)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2535512)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2079403)

A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB975562)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to

restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2541763)

Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2544893)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain access to information. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2492386)

Install this update to resolve a set of known application compatibility issues with Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB974571)

A security issue has been identified that could allow an attacker to misrepresent a system action or behavior without the knowledge of the user. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Internet Explorer 7 for Windows Vista for x64-based Systems (KB2544521)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB971657)

A security issue has been identified that could allow an authenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2393802)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB978601)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2478935)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2423089)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2507618)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB2443685)

Install this update to resolve issues caused by revised daylight saving time and time zone laws in several countries. This update enables your computer to automatically adjust the computer clock on the correct date in 2011. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB977816)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2507938)

A security issue has been identified that could allow an authenticated

local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB981322)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for .NET Framework 3.5 on Windows Vista SP1 and Windows Server 2008 for x64-based Systems (KB983587)

A security issue has been identified that could allow an attacker to compromise your Windows-based system that is running the Microsoft .NET Framework and gain complete control over it. You can help protect your computer by installing this update from Microsoft. After you install this item, you may have to restart your computer.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB973540)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2506212)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2207566)

A security issue has been identified that could allow an unauthenticated remote attacker to cause the affected system to stop responding. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB957200)

This is a reliability update. This update resolves some performance and reliability issues in Windows Vista. By applying this update, you can achieve better performance and responsiveness in various scenarios. After you install this item, you may have to restart your computer. This update is provided to you and licensed under the Windows Vista License Terms.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2281679)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2509553)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB970710)

A security issue has been identified that could allow an unauthenticated remote attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Security Update for Windows Vista for x64-based Systems (KB2305420)

A security issue has been identified that could allow an authenticated local attacker to compromise your system and gain control over it. You can help protect your system by installing this update from Microsoft. After you install this update, you may have to restart your system.

18/05/2013 Update for Windows Vista for x64-based Systems (KB955430)

Install this update to enable future updates to install successfully on all editions of Windows Vista. This update may be required before selected future updates can be installed. After you install this item, it cannot be removed. This update is provided to you and licensed under the Windows Vista License Terms.

**Grafisch****Monitor**

Naam: Generic PnP Monitor on ATI Mobility Radeon HD 4600 Series
 Huidige resolutie: 1600x900 pixels
 Werkresolutie: 1600x824 pixels
 Status: Ingeschakeld, Primair
 Monitorbreedte: 1600
 Monitorhoogte: 900
 Monitor Bpp: 32 bits per pixel
 Monitorfrequentie: 60 Hz
 Apparaat: \\.\DISPLAY1\Monitor0

ATI Mobility Radeon HD 4600 Series

Fabrikant: ATI
 Model: Mobility Radeon HD 4600 Series
 GPU: M96
 Apparaat ID: 1002-9480
 Subfabrikant: Toshiba (1179)
 Huidig prestatieniveau: Level 0
 Technologie: 55 nm
 'Die'-grootte: 145 mm²
 Transistoren: 514 M
 Releasedatum: 2009
 DirectX-ondersteuning: 10.1
 DirectX shadermodel: 4.1
 OpenGL ondersteuning: 2.1
 GPU kloksnelheid: 550,0 MHz
 BIOS kernklok: 550,00
 Bios geheugenklok: 700,00
 Versie stuurprogramma: 8.611.0.0
 BIOS versie: BR32659.001
 ROPs: 8
 Shaders: 320 unified
 Type geheugen: DDR2
 Geheugen: 1024 MB
 Busbreedte: 64x2 (128 bit)
 Pixel vulsnelheid: 4,4 GPixels/s
 Texture vulsnelheid: 17,6 GTexels/s
 Noise Level: Moderate
 Max Power Draw: 48 Watts

Aantal prestatieniveaus: 1

Level 1

Drivemaam: Canon MP280 series Printer (v12.08)

Driver pad: C:\Windows\system32\spool\DRIVERS\x64\3\CNMDRAA.DLL

Microsoft XPS Document Writer

Printerpoort: XPSPort:

Printprocessor: WinPrint

Beschikbaarheid: Altijd

Prioriteit: 1

Dubbelzijdig: Geen

Printkwaliteit: 600 * 600 dpi Kleur

Status: Onbekend

Driver

Drivemaam: Microsoft XPS Document Writer (v6.00)

Driver pad: C:\Windows\system32\spool\DRIVERS\x64\3\mxdwdrv.dll

Netwerk

U bent verbonden met het internet

Verbonden via: Intel WiFi Link 5100 AGN

Adaptertype: IEEE 802.11 wireless

NetBIOS over TCP/IP: Ingeschakeld via DHCP

NETBIOS node type: Gemixte Node

Linksnelheid: 0 Bps

Computernaam

NetBIOS-naam: PATRICIA-PC

DNS-naam: Patricia-PC

Lidmaatschap: Onderdeel van werkgroep

Werkgroep: WORKGROUP

Remote desktop

Uitgeschakeld

Console

Staat: Actief

Domein: Patricia-PC

WinInet info

LAN Connection

Het lokale systeem maakt gebruik van een local area network (LAN) om verbinding te maken met het internet

Het lokale systeem heeft RAS om verbinding te maken met het internet

Delen en ontdekking

Netwerk ontdekking: Uitgeschakeld

Bestand en printer delen: Uitgeschakeld

Bestands- en printerdelingservice: Ingeschakeld

Eenvoudige bestandsdeling: Ingeschakeld

Administratieve delen: Ingeschakeld

Network access: Sharing and security model for local accounts:

Classic - local users authenticate as themselves

Adapterlijst

Ingeschakeld

Intel(R) WiFi Link 5100 AGN

IP adres: 78.23.182.108

Subnet mask: 255.255.252.0

Gateway server: 78.23.180.1

DHCP: 195.130.137.10

DNS-server: 195.130.131.130

195.130.130.2

Realtek RTL8102/8103 Family PCI-E FE NIC
