

4.3 MAC Filter

Op deze pagina kunnen MAC filters worden gedefinieerd om dataverkeer naar apparaten in het LAN netwerk, met specifieke MAC adressen, te blokkeren. De MAC adressen worden opgeslagen in een Black list.

The screenshot displays the Cisco EPC3925 WebUI configuration page for the MAC Filter. The page title is 'Cisco EPC3925 EuroDooris 3.0 2-PORT Voice Gateway'. The navigation bar includes 'Setup', 'Wireless', 'Security', 'Access Restrictions', 'Applications & Gaming', 'Administration', 'Status', and 'Log OFF'. The 'Wireless' tab is active, and the 'MAC Filter' sub-tab is selected. The 'MAC Filter' section has two radio buttons: 'Enable' (selected) and 'Disable'. Below these are two radio buttons: 'Block computers listed below from accessing the wireless network' (selected) and 'Permit computers listed below to access the wireless network'. A 'Wireless Client List' button is present. The list contains 32 MAC addresses, each with a corresponding MAC ID (MAC 01 to MAC 32). The MAC addresses are displayed in a grid format. At the bottom of the page, there are 'Save Settings' and 'Cancel Changes' buttons.
